Summary

Fresh BSIT graduate and aspiring Web Developer with a passion for creating user-friendly and functional web applications. Through academic projects and hands-on experience, I have developed strong technical and problem-solving skills. Eager to contribute to innovative projects, learn from experienced professionals, and grow within the technology industry.

Technologies I Use

C# • Html5 • Css • JavaScript • Python • Bootstrap • MySQL • Figma • Unity • Git • Firebase

Experience

Internship – Power Apps Developer Intern

Makati City, Philippines

Development Bank of the Philippines

01/2026 - 04/2026

- Enhanced existing system features to improve workflow efficiency and user productivity.
- Updated and redesigned user interface components for a better user experience.
- Collaborated with team members to identify and implement system improvements.
- Assisted in developing and maintaining business applications using Microsoft Power Apps.
- Performed testing and troubleshooting to ensure application functionality and reliability.

Capstone Project 2 – Team Leader & Developer

Location

National College of Science and Technology

03/2025 - 12/2025

- Led a team in developing a 3D networking simulation game using Unity.
- Programmed core gameplay mechanics and networking-related features.
- Developed a companion web application with login, registration, and user profile management features.
- Managed project planning, task delegation, and team coordination throughout development.

Capstone Project 1 – Programmer 1 (Veterinary E-Commerce Website)

Location

National College of Science and Technology

03/2024 - 10/2024

- Developed frontend website features using HTML, CSS, and JavaScript.
- Created responsive and user-friendly interfaces for an online veterinary store.
- Assisted in testing, debugging, and improving website performance and usability.
- Collaborated with team members to meet project requirements and deadlines.

Education

National College of Science and Technology

Dasmariñas, Philippines

Bachelor of Science in Information Technology

06/2022 - 04/2026

Projects

NetMaster – 3D Networking Simulation Game (Unity)

Developed a 3D networking simulation game that teaches network configuration and device connectivity through interactive gameplay.

NetMaster Web Portal & Administration System

Developed a web-based management platform featuring user authentication, achievement tracking, feedback systems, and administrative controls.
